Release Plan

Product Name: UCSC Academic Planner
Team Member Name: Charles Tzou, Hannah Ekman, Anthony Campos, Jazmin Maravilla, Michael Lau
Release Date:
Revision Number: 1
Revision Date:

High Level Goals:
Students should be able to create personal accounts so that they can enter their courses into the web app to keep track of their GE and Major course progress. In addition, users should be able to keep track of their grades for their courses and also keep track of their pass/no pass percentage so that they don't exceed the 25% limit. Another feature we want to implement is a weekly schedule viewer with offline access and sms notifications so that students can always view their calendar and get notifications about when to attend class. Some potential features that we hope to implement are a forum where students can rate/recommend classes and a feature where students can upload a screenshot of their schedule and have the web app automatically log their classes into the system.

User Stories:

User Stories	Story Points (0-20)
Sprint 1 total: 22	
As a student, I want to have access to different major requirements to help plan my future schedule.	12
As a student, I want to have access to the GE/Major requirements to plan my future schedule.	5
As a student, I want to be able to enter my courses to keep track of my progress.	5
